SUMMARY

Experienced React Native Mobile Application Developer with 8 years of expertise in designing and launching scalable mobile apps for Android and iOS. Skilled in React Native, Redux, GraphQL, SQLite, and RESTful APIs, with a strong focus on intuitive UI/UX design and app performance optimization. Proficient in managing full app lifecycles and delivering seamless cross-platform experiences.

EXPERIENCE

React native Developer | Emizentech Pvt. Ltd. | Jaipur | July 2022 - Present

- **Optimized mobile app performance**, reducing load times by **30%** through efficient asset handling in **React Native**. • **Developed and integrated scalable features**, enhancing user engagement by **25%** and ensuring a smooth user experience. • **Implemented seamless API integrations** with **GraphQL, REST API, and AWS**, improving app functionality and data flow. • **Set up and managed CI/CD pipelines using Firebase**, reducing release cycle times by **50%** and improving software reliability and deployment efficiency.
- Enhanced data management and app speed by employing SQLite for optimal local storage solutions in React Native applications.
- **Enhanced UI/UX** using **Material UI and custom React Native components**, ensuring a visually appealing and user-friendly app experience.

Android | React Native Developer | Arthonsys Technologies LLP. | Jaipur | Jan 2018 - June 2022

- Started my Android & React Native journey at Arthonsys Technologies, where I gained hands-on experience in building and optimizing mobile applications from the ground up. Over two years, I worked on four different applications, refining my skills in UI design, API integrations, and state management—even though these projects didn't go live, they provided invaluable learning experiences.
- Acquired extensive experience in React Native development by contributing to three major projects, with one successfully deployed, gaining over 1000 downloads.
- Implemented advanced state management techniques, reducing app load times by 20% and improving performance for real-time data handling.
- Optimized real-time data handling processes, enhancing user interaction responsiveness by 30% and minimizing latency issues.
- Integrated complex API implementations, ensuring seamless data flow and improving backend communication reliability by 95%.

PROJECTS

OGChat | Emizentech Pvt. Ltd.

- Contributed to the development of OGChat, a pay-per-minute instant messaging platform designed for professionals to monetize expertise through chat, voice, and video calls, resulting in over 50,000 downloads and a 4.8/5 user rating across platforms.
- Developed a high-performance mobile app using React Native, ensuring a smooth and responsive user experience across Android and iOS, reducing app crashes by 20%.
- Integrated Agora SDK for real-time audio and video calls, achieving 99.9% call connection stability and enhancing communication quality for 5,000+ active daily users.
- Implemented SQLite for efficient local data storage, improving app performance and offline accessibility, reducing data-related errors by 30%.
- Managed state effectively with Redux and Recoil, ensuring a scalable and optimized user experience, supporting 10,000 concurrent users without performance degradation.
- Successfully launched OGChat on Google Play Store and Apple App Store, contributing to 50,000+ downloads within the first 6 months.
- Published the [OGChat](#) on Google Play Store. • Released the [OGChat](#) on Apple App Store.

Movingful | Emizentech Pvt. Ltd.

- Led the development of the Movingful platform, implementing efficient UI frameworks and AWS Amplify integrations to optimize real-time user interactions, resulting in a 40% improvement in user engagement.
- Utilized advanced React Native animation libraries to enhance the user journey, contributing to a 35% increase in user retention and a smoother app experience.
- Established efficient data flow using REST APIs, ensuring seamless interaction and reliable data exchange for referral tracking and user activities.
- Deployed AWS Amplify to increase application scalability and strengthen cloud-based features, enabling robust architecture for handling high user loads.
- Enhanced algorithm efficiency by tuning complex data queries, achieving a 30% improvement in app responsiveness for user recommendations and business processes.
- Published the [Movingful](#) Android app on Google Play Store.
- Released the [Movingful](#) iOS app on Apple App Store.

Carlift | Arthonsys TEch

- Built and launched scalable React Native applications for both Android and iOS platforms, achieving a 40% user base increase within the first six months. •Utilized RESTful APIs and WebSocket solutions to enable real-time ride booking, improving cab tracking accuracy by 85% and reducing delays by 30%. •Designed and implemented intuitive UI components for booking clarity and schedule adjustments, resulting in a 25% reduction in booking errors and enhancing user satisfaction.
- Integrated calendar functionality to streamline ride bookings, increasing scheduling efficiency by 35% and improving user convenience.
- Engineered an Android driver app with ride acceptance/decline features and secure online payment systems, contributing to a 20% improvement in driver satisfaction.
- Developed advanced algorithms for automated ride scheduling, optimizing car dispatch operations and reducing average wait times by 15%.
- Published the [carlift](#) user app on the iOS App Store.
- Released the [carlift](#) user app on Google Play Store.
- Deployed the [carlift driver](#) app on Google Play Store.

EDUCATION

Post Graduation | MCA | Apex College | RTU
Jaipur (Rajasthan) IN | 2017

Graduation | BCA | IBB College | University Of Kota
Kota (Rajasthan) IN | 2014

SKILLS

•Mobile Development & Architecture

- React Native (Advanced) – Expert in building scalable, high-performance cross-platform mobile applications
- React Hooks – Proficient in optimizing functional components using useState, useEffect, useMemo, useCallback, useRef
- Modular & Scalable Architecture – Implementing best practices for code reusability, maintainability, and scalability

Programming Languages & Frameworks

- TypeScript, JavaScript (ES6+) – Strong experience in modern JavaScript and type-safe development

State Management & Data Flow

- Redux, Redux Toolkit, Recoil, Context API – Expertise in managing complex application states efficiently
- Flux Architecture & Middleware – Implemented Redux Thunk & Redux Saga for asynchronous operations

Data Management & Offline Storage

- SQLite, Realm, WatermelonDB, Async Storage – Experience in handling local storage and offline capabilities
- MMKV & Encrypted Storage – Implemented secure storage solutions for sensitive user data

Networking & API Integration

- REST API, GraphQL (@apollo/client), Axios, Fetch API, WebSocket – Implemented efficient API communication and real-time updates
- Socket.io – Integrated real-time messaging, notifications, and live location tracking

Cloud Services & Integrations

- Firebase (Firestore, Auth, Cloud Messaging, Cloud Functions) – Expertise in authentication, push notifications & cloud-based storage
- AWS Amplify & AppSync – Experience in scalable backend solutions for mobile applications

CI/CD & Deployment

- Firebase App Distribution – Managed automated testing and release cycles
- Google Play Console & Apple App Store – Expertise in app signing, submission, and release management

UI/UX Development & Styling

- Material UI, Styled Components, React Native Paper, NativeBase – Expertise in building custom UI components and responsive designs
- Lottie Animations & Gesture Handling – Implemented engaging animations and smooth user interactions

Navigation & Deep Linking

- React Navigation (Stack, Bottom Tabs, Drawer, Dynamic Linking) – Advanced navigation setup for complex app flows
- Deep Linking & Dynamic Links – Enabled seamless in-app navigation across platforms

Authentication & Security

- Firebase Auth, OAuth, JWT – Implemented secure authentication and user authorization flows
- Biometric Authentication (Face ID, Touch ID) – Integrated device-based authentication for enhanced security

Performance Optimization & Scalability

- Code Splitting, Memoization, Lazy Loading – Optimized app performance and load times
- Hermes Engine – Improved JavaScript execution performance

Real-Time & Advanced Features

- Agora SDK (Audio/Video Calling, Live Streaming) – Integrated real-time communication for chat and consultations
- Geolocation & Live Tracking – Implemented Google Maps & OpenStreetMap-based live tracking
- Push Notifications (FCM - Firebase Cloud Messaging) – Configured in-app and background push notifications
